CAREER SUMMARY

As a fresher in the testing arena, I come with a basic understanding of JAVA and SpringBoot. I'm quick to pick up new software and technologies. My communication skills help me work well with colleagues, expressing ideas clearly and to the point. Shifting from development to testing, I'm keen to apply my analytical skills and eye for detail to ensure software products are top-notch.

EXPERIENCE

FORD MOTORS

(July 2023 - Feb 2024)

- As a backend developer on the team responsible for managing the Ford Service website, my primary task revolved around modernizing the REST APIs of the existing system.
- This project, which involved migrating from Java Spring Boot and Angular to Pega Systems, aimed to enhance the service process for service engineers. Previously, the system was entirely written in JSF.
- Working closely with frontend developers, I ensured seamless integration between the migrated backend functionalities and the frontend components. Throughout the project, my focus remained on backend development using Spring Boot, contributing to the overall success of the migration process and the improved efficiency of the service management system.

SKILLS

Programming Languages: Java, C, Python

Framework - Selenium Python

Database - MYSQL.

Knowledge in **GITHUB.**

Proficient in **Core Java** Programming.

Knowledge of **object-oriented programming** concepts.

AREA OF INTEREST

Automation Testing

EDUCATION

2023 | Bannari Amman Institute of Technology TamilNadu, India - 8.39 CGPA Bachelor of Engineering - Computer Science (till 7th sem)

2019| VVMHSS Matric Hr Sec School TamilNadu, India - 75.50% HSL

2017 | VVMHSS Matric Hr Sec School TamilNadu, India - 92.0% SSCL

CERTIFICATION

Selenium webdriver with PYTHON from Scratch + Frameworks(UDEMY -MARCH 2024)

LANGUAGE

English.

Tamil
